ANSHU TRIPATHI

USA | (+1) 726-203-5807 | anshu.tripathi@my.utsa.edu | linkedin.com/in/anshutripathi119 | github.com/anshutripathi11

EDUCATION

University of Texas at San Antonio, San Antonio (TX), USA — August 2024 - May 2026
Master of Science in Computer Science — GPA - 4.0
Coursework: Computer Architecture, Data Science, Machine Learning, Operating Systems, Algorithms, Software Engineering
Awarded Departmental Scholarship for academic excellence; Selected Participant, ACM PEARC25 Student Program

Banasthali Vidyapith, Jaipur (RJ), India — July 2015 - May 2019
Bachelor of Technology in Computer Science and Engineering — GPA - 3.4

TECHNICAL SKILLS

Language	Python, Java, C++, C#, SQL, JavaScript, TypeScript, HTML/CSS, Bash/Shell, XML
Frameworks	Spring, Flask, React, Angular, Node.js, TensorFlow, Keras, PyTorch
Libraries	Pandas, NumPy, scikit-learn, SciPy, Seaborn, XGBoost, SHAP, OpenCV, Hugging Face
Tools/Technologies	APIs (REST), GitHub, Docker, Jira, Linux, JSON, Tableau, Power BI, CI/CD (Jenkins, DevOps)
Cloud/Database	AWS (Lambda, EC2, IAM), Azure (**Certified**), Oracle Cloud, Oracle Database, MySQL, DynamoDB

EXPERIENCE

DevOps Engineer Intern | Swivel (an SWBC Company), San Antonio (TX), USA — June 2025 - Present
- Developing a **Jira** issue creation app with **Atlassian Forge** to streamline task submission and reduce manual effort by **60%**.
- Enhancing software and automating workflows by managing **CI/CD** pipeline across **AWS** and **Azure** for secure **financial data systems**.

Graduate Research Assistant | MBMS Lab, **UTSA,** San Antonio (TX), USA — December 2024 - May 2025
- Developed and optimized a high-performance **3D** model of trabecular bone using **C++** and **Monte Carlo** simulations.
- Implemented **advanced spatial modeling** and **optimization techniques** to accurately simulate bone microarchitecture.

Graduate Teaching Assistant II | UTSA, San Antonio (TX), USA — September 2024 - December 2024
- Evaluated **120+ weekly assignments** and collaborated with faculty to refine rubrics for **CS2233**(**Discrete Mathematics**).

Senior Software Engineer | Accenture, Bengaluru (KA), India — June 2021 - July 2024
- **Application Development:** Designed and developed the agile planning solution to manage terabytes of enterprise data, aiding in budgeting and forecasting by leveraging **Oracle Hyperion and SQL, VBS/Power Shell scripting, Python, Java.**
- **Leadership:** Led a team of **8 SDE1s** in developing core components for **Oracle HPE**, from technical analysis to deployment and managed relational databases to ensure **backend** data integrity across multiple environments.
- **Integration & Automation Tool:** Enhanced user support and system reliability for over **1000 finance users** by resolving technical and data issues and integrating the system with **SAP** and **Workday**. Enabled offline planning, workflow capabilities, and multi-currency functionality for streamlined operations achieving **30%** increase in data loading efficiency.
- **System Upgrade:** Successfully upgraded Hyperion Planning from version **11.2.4** to **11.2.6**, enhancing functionality, improving user experience, and reducing deployment time by **84%**, with integration testing to ensure system compatibility.

Software Engineer | Accenture, Bengaluru (KA), India — June 2019 - May 2021
- **User Support and Data Management:** Resolved over **690** user queries and ticket requests within SLAs; optimized complex **SQL** and **PL/SQL** queries on **Oracle DB** and **SQL Server** for large datasets; automated data updates using **batch scripts**.
- **DevOps Transformation:** Developed and maintained Hyperion Planning/Essbase applications; implemented **DevOps** practices with **CI/CD** pipelines, streamlining deployments across Development, Testing, and Production environments.
- **System Scaling and Performance Optimization**: Scaled Oracle DB systems and servers to handle increased data loads; optimized **MaxL calc scripts**; managed user security across environments, enhancing overall system performance.

PROJECTS

Geographic Information Systems (GIS) | UTSA, San Antonio (TX), USA **[Link]** — February 2025 - May 2025
- Developed and optimized **QuadTree**, **R-Tree**, and **R* Tree** spatial indexing structures in **Python** for large-scale **GIS** applications, enhancing memory and performance through spatial visualizations using **Matplotlib** and GeoJSON datasets.

LRU Cache Simulator | UTSA, San Antonio (TX), USA **[Link]** — November 2024 - December 2024
- Designed a **Python** based cache simulator to analyze CPU cache behavior, processing over **10 million** memory access records and achieved up to **98%** accuracy, with execution times optimized to under **0.3 seconds** for typical workloads.

WakeWell | UTSA, San Antonio (TX), USA **[Link]** — August 2024 - December 2024
- Developed a health recommendation system by processing **100k+** sleep, food, and exercise samples to analyze alertness.
- Developed predictive models with **Scikit-Learn**, **XGBoost**, and **LightGBM**, improved interpretability with **SHAP,** and visualized results with **Bokeh**, **Plotly**, **Matplotlib**, and **Seaborn**.
